

Wasting Away In London! Lindsay Lohan Has Dropped 15-20% Of Her Body Weight, Estimates Top Nutritionist — ‘She Looks Limp, Bony &

www.plexidigest.com

“Lohan appears to have dropped almost 15 pounds in the past 9 months,” certified nutritionist and personal trainer Franci Cohen who has never treated Lohan told Radar. “The photos of her now appear a bit skeletal. Her face is drawn, and bones in her arms and legs are much more visible than before. While this may be a healthy weight loss in another person of similar height and size, it doesn't appear to be the case with Lindsay,” Cohen said.
